Report of the Mayor

Dec. 31, 1919.

To the Citizens of the City of Rutland:

I hereby submit my first annual report as Mayor of the City of Rutland for the year ending December 31, 1919, for your consideration.

It has been my endeavor, working with the members of the City Council, to conduct the affairs of our city for the best interests of the people we represent. The reports of the City Treasurer and Commissioner of Public Works are most gratifying to me and I trust will be to the people of Rutland, especially at a time when the prices of material, labor and everything that enters into the cost of the work are so high. We have been able to close the accounts for the year ending December 31, 1919, with a cash balance in our general account of \$11,385.59. Only for a temporary loan of \$14,000.00 from our Water Department for the purchase of the Armory site, our cash on hand in this department would show a balance of \$26,156.09, in place of \$12,156.09. This loan will be paid back from a bond issue the coming year.

We also have paid out of the general fund \$11,000.00 for the new Fire Truck this last year. The State of Vermont appropriated the sum of \$1000.00 for permanent work on the highways leading into the city. This money we did not use, so the matter was taken up with Mr. Bates to see if it could not be carried over into next year's account. This he said he would do, provided the city set aside an equal amount from this year's street account. This we have done and have 511.19 to the good, after setting aside the \$1000.00, as our street account shows a balance of \$1,511.19.

We have reduced the bonded indebtedness of our city \$24,252.95, making the net bonded indebtedness \$207,783.42.

The tax rate of the city of Rutland is \$2.20, while in reality our tax is \$1.80, the same as before the war, the extra 40% going to the State. I doubt if many people realize how much the City of Rutland pays to the State of Vermont. For your information I would say, the city has paid to the State this last year in round figures \$64,000.00, a lot of money over which we have no control. The cause for the additional appropriation in the Police and Fire Departments was due to the increase in salaries and the purchase of the new Fire Truck, after the budget was made up at the beginning of the year, January 1, 1919.

I am not going into any details of the receipts or expenditures of the various departments, as they will be shown by the report of your Treasurer.

DEPARTMENT OF PUBLIC WORKS

In this department I would say that we have not done all that we would like to have done, but we tried to accomplish what we could with the money we have had to do with. We have not done any real permanent work on our streets, but have done what we could in the way of resurfacing, smoothing and patching of our streets, which has improved them and with proper attention each year ought to go for some time, or until we can afford to do more permanent work. We have tried to divide up this work in the different parts of the city as best we could. We have not been able to do work on as many streets or sidewalks as we would like to have done, as our finances would not permit this. We are in hopes to get to some of this work the coming year.

I feel that the work that has been done on a whole has been quite satisfactory, and that the patrol system that was started this year has worked out fairly well and that we shall be able to accomplish much more with this system the coming year, as we have been hindered in getting material for this work.

The work in this department was not started as early as we would like to have started it in the spring. It seemed to be the sentiment of the City Council and the Citizens that we

engage an expert City Engineer from outside our city and appoint him to the offices of Commissioner of Public Works, City Engineer, Supt. of Streets and Sewers. After writing to a number of different cities and Engineering Departments in our country, we were able, through some letters of recommendation to secure the services of Mr. Donald D. Snyder of Albany, N. Y., who had had seven years' experience in that city under one of the best Engineers in the country. Mr. Snyder took up his work here in May. I think the people of Rutland will agree with me that we have the right man in the right place. He is very much interested in his work and likes the people of Rutland. And now that he has become better acquainted with the people and the conditions existing in our city during the few months that he has been here, he will be much more valuable to us the coming year. He is always open to suggestions and complaints, and if reported to him, I am sure he will try and attend to same if it be in his power to do so.

The report of Mr. Snyder will show for itself the work that has been done and the money expended, a report that every citizen should be proud of.

Mr. Snyder has suggested to me that we should fence in our property between Post and Spruce Streets that is used for storage and an addition be built on to the present building to give us more storage for our city tools and machinery, also that we have a space at one end of the building enclosed that may be heated for doing work on the roller during slack hours in the winter, so we can get the machines ready for use when spring opens. As it is now, we haven't any place for this work. The machines being used until late in the fall could be put away in much better condition. This, I think should be done. Another thing that has been suggested to me is that this city should build a two story building on the land owned by the city south of our City Hall building, to give more storage room for city supplies and tools. This is a good suggestion, but our funds may not permit this on account of the high cost of everything in the building line at present.

DEPARTMENT OF PUBLIC SAFETY.

We have been able to bring about in this department the purchase of another piece of modern motor driven fire apparatus, of the American La France Fire Engine Co. make with a motor driven pumping attachment. We have also added one more regular fireman to the force at Station No. 1. Our first motor driven combination Truck has been thoroughly overhauled and painted and is now in service at Station No. 2. The old horse stalls in this Station have been removed, a new hardwood floor laid, and a cement wash stand installed. This work was done by the men in the department. The horses, harnesses and one hose wagon have been sold and the old Fire Engine was turned in towards the new truck. The men in charge of the Police and Fire Departments under this head have performed their duties in a most efficient way and for the best interests of the city.

DEPARTMENT OF CHARITIES AND CORRECTIONS.

This department under the charge of Overseer Mr. John J. Hickey and Mrs. Hickey has been most creditably taken care of. There should be some much needed repairs made at the City Farm this coming year.

MEMORIAL HALL.

The building is in need of some repairs that should be made the coming year, also some electric lights installed in the large room on second floor. The City Council has voted to increase the appropriation to the Library Association for the coming year, something that was very much needed on account of increased expenses.

CONCLUSION.

In conclusion, I desire to express my appreciation to the Honorable City Council for their hearty cooperation in conduct-

ing the affairs of our city and for the good feeling that has existed all through the year.

I wish to thank the heads of the different departments as well as all the men connected with them for their assistance in conducting the city affairs.

Respectfully submitted,

JAMES C. DUNN,
Mayor.

Report of the City Treasurer

To the Honorable City Council:

Gentlemen:—I herewith present to you my report as City Treasurer for the fiscal year ending Dec. 31, 1919.

RECEIPTS.

Respectfully submitted,

JOHN N. WOODFIN,
NEWMAN K. CHAFFEE,
HENRY F. FIELD,
Commissioners of Sinking Fund.

Report of the Commissioner of Public Works

To the Honorable City Council:

Gentlemen:—In accordance with the provisions of the City Charter, I beg to submit herewith the 11th annual report of the Commissioner of Public Works for the year ending December 31, 1919:

The cost of doing the work during the year just ended has been materially higher than ever before. Not only have materials and supplies advanced, but labor costs have increased about 20 per cent over last year, due mainly to the adoption of the eight hour day and increase in the cost of team hire.

Table No. 1 below shows, for the street department, the total number of hours of labor, the total number of hours of teams, the total cost of each and the average cost per hour, and the per cent increase for the years 1918 and 1919. It will be noted that, while the payroll was \$671.91 more in 1919 than in 1918, the labor was less by 5954 hours and the teams by 2721 hours.

TABLE NO. 1.
COMPARISON OF LABOR AND TEAM COSTS ON STREET DEPT.

Year	Total hrs. labor	Total cost labor	Av. cost per hr.	Total hrs. teams	Total cost teams	Av. cost per hr.	payroll
1918	53,321	\$15,786 76	\$0 296	11,713	\$6,755 34	\$0 576	\$22,542 10
1919	47,367	17,065 87	0 36	8,992	5,775 01	0 642	23,214 01
Percentage increase, labor							21.6
Percentage increase, teams							11.5
Pay roll 1919							\$23,214 01
Cost of same number of hours, labor and teams, in 1918							19,200 02
Increase in cost for 1919 over 1918							4,013 99
Percentage increase							20.9

The sewer and water departments were affected to a proportional extent.

STREETS

So many of the main thoroughfares and business streets were in need of resurfacing that it was deemed best not to attempt any new construction this year, but to resurface and repair as large an area as possible with the funds available.

Table No. 2 shows the macadam roads that were resurfaced, the area of each in square yards, the cost per square yard and the total cost.

The total area of macadam resurfaced amounted to 66,398 square yards at an average cost of slightly less than 13½ cents per square yard.

The 3½ ton truck gave almost perfect service during the year. During the progress of the work on the Creek road, it regularly made eight trips a day, the average haul being about seven miles for the round trip. Before being laid up for the winter, it was thoroughly overhauled and painted and is in first-class condition.

In addition to the resurfacing, considerable patching was done with a cold asphalt repair cement. The results obtained warrant an even more extensive use of this material next year.

Those streets were oiled for which we received petitions. Due to a decrease in the price of oil, the cost of oiling was materially reduced this year over that of last year. The assessments were as follows; one oiling 1½ cents per square yard, two oilings, 3 cents per square yard; sprinkling with water 2 cents per square yard, and with Dustex 1 cent per square yard.

Tables Nos. 2 and 3 together show the cost of the work done in the street department.

SIDEWALKS

Petitions for sidewalk construction were rather slow in making their appearance, so that it was not until fall that any work to speak of was done. Notwithstanding the late start, however, new tar concrete walks were constructed to the value of \$2154.99, of which the city paid \$1106.66; resurfacing to the value of \$364.08 of which the city paid \$201.65; grading and filling to the value of \$148.50 and miscellaneous \$472.61 of which the city paid the total cost, making a total of \$1929.42 expended by the city for sidewalks.

Tables Nos. 4, 5 and 6 show in greater detail the work in the sidewalk department.

CITY OF RUTLAND

SEWERS

New sewers were constructed in Highland avenue and Columbian avenue, and the sewer in East street, between Killington avenue and Terrill street replaced with larger pipe. A manhole and a handhole were constructed on the Highland avenue sewer, two manholes on the Columbian avenue sewer, and five manholes on the East street sewer, to provide easy access for cleaning, etc.

The excavation in Columbian avenue was extremely difficult owing to the presence of innumerable boulders, both large and small. Some blasting was necessary, but most of the boulders were hoisted out of the trench and carted to the dump.

The construction of the East street sewer presented a variety of difficulties, which, though not serious, were exasperating to say the least. Heavy and frequent rains, the necessity of pumping the sewage and storm water, the presence of ledge rock and also a 12 inch water main in close proximity to the sewer, so that blasting had to be done very carefully, delayed and hampered us to no small extent.

During the season, the sewers in Park, Howe, East and Madison streets became stopped, requiring excavation in each case. At Madison street it was necessary to uncover the sewer twice. A manhole has since been built at this point which will enable us to keep the sewer free without digging.

Various other stoppages were dislodged by the use of sewer rods.

Tables Nos. 7 and 8 show the cost of the work in the sewer department.

ENGINEERING

Lines and grades were given for the sewers, water mains and sidewalks constructed during the year and measurements and cross-sections taken in preparation for the work of the coming year. In addition, the records in the office are being re-arranged and re-indexed to make them more readily accessible.

There is a large amount of work that should be done to provide the number and kind of records that ought to be on file in this office. Such work will be accomplished as rapidly as circumstances permit.

WATER

The cost of maintenance and repair of the water distributing system was considerably less than in 1918, due to the mild winter of last year. There were no frozen mains, services or hydrants during 1919.

A total of 1642 feet of 6 inch and 100 feet of 2 inch mains were extended, two new hydrants set, two hydrants set in place of broken ones, six valves set on mains, and four set on hydrant branches during the year.

The tables below give in detail the work accomplished by this department and the cost.

REMARKS

I wish especially to call attention to the need of an adequate sized building at the Post street store yard, in which could be kept all the implements and machinery belonging to the city. Such a building should be heated and provided with a work room, so that the equipment could be overhauled, repaired and painted during the winter months.

Also, a substantial fence, similar to the one at the Standard Oil Co.'s plant, ought to be built around the yard. A great deal of pipe is broken and other damage done through lack of protection.

The street lines of the City need to be definitely determined and permanently marked on the ground. Very few of them are

so marked, it being necessary in most instances to use markers on private property to locate the lines, which markers may or may not be right. In the future, it should be required, that, before a new street is accepted by the City, all corners be located on the ground by suitable monuments.

Existing water mains smaller than 6 inches in diameter should be replaced as rapidly as possible. There are also some mains and many services above the average frost line, entailing considerable expense for thawing. In 1918 that expense amounted to over \$3000.00. An effort should be made to remedy this condition.

In closing this report, I wish to express my appreciation to the various city officials, and also to the employees of the different departments for their help and co-operation during the past season.

Respectfully submitted,

DONALD D. SNYDER,
Commissioner of Public Works.

Report of the Commissioner of Public Safety

To the Honorable City Council:

Gentlemen:—I herewith submit the annual report of the Fire and Police Departments for the year 1919.

FIRE DEPARTMENT

The Fire Department is made up of a chief engineer, a first assistant engineer, a second assistant engineer, seven regular firemen and fourteen call men.

The chief engineer, second assistant engineer and four regular men are at Station No. 1. The first assistant engineer and three regular men are at Station No. 2.

During the year the Department responded to 52 still alarms and 16 bell alarms, a total of 68, and the fire loss for the past year was remarkably low—less than \$34,000, about \$20,000 of which was damage to the Quinn building.

An invaluable addition was made during the year, when a triple combination pump, chemical and hose truck replaced the horses at Station No. 2, this equipment enabling the men from both stations to respond to all bell alarms.

The principal recommendation I have to make is the addition of a small car for the use of the Chief Engineer, which would not only be used in responding to alarms, but is needed to give the required attention to the fire alarm system and especially the boxes. Would also recommend the installation of a box at the corner of State and Hazel streets.

The expense of the department for 1919 is as follows:

Pay Roll	\$11,838 02
Fuel	507 15
Repairs	163 57
Supplies	153 62
Hay and Grain	380 14
Laundry	59 74
Telephone	15 95
Light and Power	151 54
Auto Supplies and Repairs	135 52
Insurance	190 30
Blacksmithing	54 60
Repairs Station No. 2	142 62
Rent Station No. 2	18 00
New Equipment	11,416 75
Com. Salary, Chalmers \$100, Harrison \$25	125 00
Sundries	22 87
	<hr/>
	\$25,374 99
Cr. Sale of horses, equipment	350 00
	<hr/>
	\$25,024 99

The above includes extra expenses for 1919 of about \$11,000, the principal items being the purchase of the new truck and the material for remodeling Station No. 2, the work of changing over the station being done entirely by the men of the department.

POLICE DEPARTMENT

The Police Department consists of a Chief of Police, six regular patrolmen, and a number of special officers, one of whom has been employed on regular duty during the entire year.

The closing of the saloons has made a material falling off of arrests for intoxication for the latter half of the year, but the increasing automobile traffic has taxed the department to its

fullest extent and the very few accidents occurring during the year reflect great credit on the efficiency of the department.

One additional regular man is absolutely necessary to take care of this growing traffic, and I would recommend the purchase of a motor cycle to enable the department to enforce the regulation in regard to speeding, almost an impossibility with the present equipment.

During the year there have been 133 arrests, 76 for intoxication and 57 for other offences, and 65 people have been given lodging.

The expense for the year 1919 is as follows:

Pay Roll	\$8,136 02
Telephone and Signal Service	205 91
Repairs and Supplies	255 92
Commissioner's Salary (Chalmers, \$100; Harrison, \$25)	125 00
	<hr/>
	\$8,722 85

FRED C. ROBERTS,
Commissioner of Public Safety.

Report of the City Attorney

To the Honorable City Council:

I submit herewith, a report of the business of the City Attorney for the year ending December 31, 1919.

During the biennial session of the General Assembly, the City Attorney appeared before the Committee on Corporations, in regard to certain bills then pending which had to do with the discontinuance of a part of the Railway system of the Rutland Railway, Light and Power Company. These bills were ultimately defeated, which resulted in the continuation of full service by the Power Company.

The City Attorney has been called upon to defend two suits in which the City of Rutland were defendant, viz: Charles Turner vs. City of Rutland, and B. S. Hyland; and Charles Turner vs. Harry B. Whittier, the former case being brought in the Court of Chancery, the latter in the Vermont Supreme Court, both of which cases are now pending.

The City Attorney has, upon two occasions, appeared before the Vermont Public Service Commission in regard to the matter of the consolidation of certain Electric Companies under the name of the Vermont Hydro-Electric Corporation.

The City Attorney has been called upon to prosecute during the past year, four criminal cases which have resulted in conviction in three instances.

During the year, several insane paupers have been removed to the Brattleboro Retreat for treatment, through the efforts of the Overseer of the Poor and the City Attorney. And the City relieved from further liability for their support and care.

The City Attorney was called upon to act as Counsel for a committee appointed by the Board of Aldermen, to investigate the Rutland Hospital, and acted with them in various conferences and hearings upon matters material to their investigation.

During the month of November, the City Council, through the City Attorney, instituted condemnation proceedings against the Vermont Hydro-Electric Corporation and H. Edward Dyer for the purpose of acquiring certain water rights and privileges on the north branch of Cold River to complete its water supply system. The City Attorney has been ably assisted in this matter by Walter S. Fenton, Esquire, of this city, and the matter is now pending in the courts.

The City Attorney has frequently assisted the City Constable and Overseer of the Poor in the collection and adjustment of taxes and other claims which the City has had against different persons and other Towns and Cities.

Throughout the year, the City Attorney has been called upon to advise or assist various committees from the Board of Aldermen and Officers of the City, and has always been glad to extend such advice and assistance as was in his power whenever called upon.

Respectfully submitted,

LEONARD F. WING,
City Attorney.

Report of Overseer of Poor

To the Honorable City Council:

I respectfully submit my report as Overseer of Poor for the year ending December 31, 1919.

Appropriation	\$6,500 00
Credits	773 80

JOHN J. HICKEY,
Overseer of Poor.

Department of Public Health

The following statistics for the year 1919 were compiled from records in the city clerk's office. The local health officer, Dr. George Rustedt, held office until about August 1st. Since that date, the district health officer, Dr. B. D. Colby, has been acting for this district under the provisions of Act No. 195 of the Acts of 1919.

Respectfully,

R. W. KENYON,
Inspector of Buildings.

Report of City Weigher

To the Honorable City Council:

I respectfully submit the following statement of weighing done on the City scale during the year 1919:	
Paid the City Treasurer for 3053 weights	\$305 30
Weigher's fees	152 65
Net	\$152 65

Number of loads of coal, etc., weighed for the school buildings, City and Memorial halls, free of charge, 659, making the total number of weights, 3712.

Respectfully submitted,

H. B. WHITTIER,
City Weigher.

Report of Rutland Hospital

Statement of the number of patients cared for at the Rutland Hospital for the year 1919, and the total expense to the hospital, as shown by report filed with the City Council.

Total number of patients for the year	87
Total number of days service	1601
Total expense of patients	\$4,968 54
Board and care	\$4,284 66

I have examined the above accounts and find them correct as stated.

HELEN B. SMITH,
Acting Auditor.

Report of the President of the Board of School Commissioners

To His Honor the Mayor and Citizens of Rutland:

For the third consecutive time it is my privilege, as President of the Board of School Commissioners, to report to you and briefly outline conditions as they exist in the Department of Education.

The year just ended has been a successful one, and successful under rather difficult conditions. Whenever a nation emerges from a great struggle there has to be a period of readjustment and this period is a trying one. Unsettled conditions are often discussed in the home and echoes of these discussions eventually reach the school room. It is at a time like this when the teaching profession comes into its own and for a good part of the day can, while practicing tolerance and moderation, never cease to preach the stability of American institutions.

I believe that Rutland is very fortunate in being comparatively free from those offenses that spring from unsettled social conditions coupled with all too settled socialistic ideas, offenses that have caused annoyance and alarm in municipalities but little larger than our own. And I attribute as one of the reasons for this satisfactory condition of things, the fact that our schools have during the past years enjoyed a large degree of stability. Think what it means to any municipality to have trusted employes, employes whose trustworthiness is evidenced by the length of their term of service. Few changes have taken place in the High School during the last five years, while our Graded Schools enjoy the services of fifteen teachers who have taught in Rutland for fifteen years or more and of thirteen teachers who have taught over twenty years. The knowledge of human nature, the power of self command, and the full appreciation of local conditions and ideals that those years represent are, I feel certain, standing our City in good stead at present.

FINANCES

If the year from an educational standpoint has been satisfactory, from a financial standpoint it has been equally so. The report of the Finance Committee has already been printed and in it you will note that fuel and lights, supplies, text books, everything necessary for the maintenance of the school system has advanced in cost over the high prices of a year ago and our balance \$1686.40 represents money actually on hand after the payment of all outstanding bills for 1919. The fact that the receipts for tuitions are \$600 greater than similar receipts for 1918 is a fair indication of the way in which our schools are regarded in the neighboring towns.

SCHOOL BUILDINGS

The amount of \$3595.50 expended for repairs during the past year is large and necessarily so. Since 1916 very little has been spent upon repairs and the expenditures this year were absolutely necessary. The larger items consist of \$905.49 for installing new furnaces in the Watkins Avenue building, \$832.89 for increased radiation at the Lincoln Building, \$409.91 for improving the toilets at the Dana school, much of which was new work, and \$1078.42 for increased radiation in the rooms and stacks at the High school. This High school problem has tried the patience and taxed the exchequer of previous School Boards. But I believe the conditions are now satisfactory, and I congratulate the Building Committee upon having solved the difficulty. Repairs may have to be made to the boilers at Dana school and to the toilets and gutters in the Lincoln building; outside of these items the School buildings are in good condition. I can see no reason for the School Board retaining the School street building. The great majority of the children in that neighborhood attend the Parochial schools, and those who do not are easily accommodated at the Madison, Longfellow and Kingsley buildings. The real estate is valuable but it would cost nearly \$3000 to put the building in condition for school use. I would

respectfully recommend that the insurance upon this building be cancelled and the property turned over to the city.

THE HIGH SCHOOL

The High school registration, this year, is the largest in the history of our schools. At the opening of the fall term there were 467 pupils registered and this number increased to 480. At present the High school registration is 450. Before school opened the principal of the High school asked the School Board for one more teacher. The Teachers' Committee did not report favorably upon this recommendation and, in doing so, were, as I am informed, actuated by the belief that conditions would remedy themselves, as in past years, by the dropping out of a considerable number of students before the end of the fall term. From the figures that I have just quoted it is apparent that this expectation has not been realized. Conditions are very much congested and there are three teachers in the English Department who meet, on an average, 150 pupils daily or 750 pupils during the week. This condition is simply impossible, it allows too little time for the teacher to devote to each pupil and, in conjunction with outside work such as study for the following day, correction of themes, preparation and correction of tests and examinations, puts an amount of work upon a teacher that would not be tolerated in other cities. I respectfully recommend that an additional teacher be secured for the High school for the balance of the school year.

This is the second year of Vocational Training in the High school and the course seems to be giving general satisfaction. Twenty-one boys are taking the course and are learning practical work in our local industrial plants. At least a dozen more boys could readily find part time employment if they were taking this course.

I regret that the course in Manual Training for boys in the grades has been allowed to lapse. This course was commenced in a small way, but a few years ago, 24 work benches were constructed and equipped with full sets of tools and about \$1500

worth of machinery installed. For several years the course was very successful and the exhibits of work done by the pupils always excited most favorable comment. We still have the benches, the tools, the machinery and the children, but the teacher is lacking. The whole affair savours of what the political economist would term "economic waste." In my judgment the course should be put back to the status that it occupied three or four years ago, or the equipment sold, the rooms formerly used devoted to some other purpose and the course relegated to that oblivion that awaits so many educational experiments that are abandoned upon the very threshold of success.

A complete set of china should be purchased for the cooking school, and a large mirror furnished for the benefit of the classes in sewing at the Dana building. A cracked pitcher and a totally inadequate supply of table china do not accord with my bachelor ideas of good housekeeping and, in a course that exploits the "making and fashioning of garments," a mirror is a necessary adjunct,—at least I am so informed. I make these comments in all seriousness, I believe thoroughly in these courses in domestic science and home economics and I want to see them amply provided with whatever is essential to their success.

The social and athletic activities of the schools have, as formerly, been properly encouraged and carefully supervised. Schools throughout the country are laying greater stress each year upon these important phases of school life. I believe that it is a wise policy and hope that student activities will continue to be encouraged and emphasized in our local schools.

TEACHERS' SALARIES

Early in December, at the request of the Rutland Teachers' Association, I appointed a committee to examine into and report upon the salaries, living and working conditions of the teachers in the schools of Rutland. This committee has reported and at the proper time the Board of School Commissioners will doubtless determine what action, if any, they will take in order to

bring the findings of this Committee to the attention of the taxpayers for action. It would hardly be proper for me to discuss this report but I cannot refrain from saying a word or two upon the general subject of salaries now being paid to our public school teachers. This question, I may add, is not being discussed in Rutland alone, it is being agitated all over this country, and is, today, the biggest question with which any person interested in the public schools has to deal. I assume that a large majority of those who are taking the trouble to read this report have at some time in their lives attended the Rutland schools, many of them, today, have children attending these schools, I expect that they are alive to the defects and I hope that they are not unappreciative of the good results accomplished by our schools. Over 2100 children are registered and they are being educated at an average cost of \$40 a year per pupil. When parents willingly pay from \$800 to \$1500 a year in order that their children may enjoy the environment, social advantages, acquaintances and specialized college preparation of a private school, I submit that the cost of public school education in Rutland is not excessive, especially in view of the fact that statistics compiled at Harvard and Yale Universities show that, after the middle of the Sophomore year, students educated in public schools show scholastic ability superior to that of their classmates who are more gently and more expensively educated. Doubtless all my readers are only too familiar with the great increase that has taken place in the cost of living during the past four years. The Committee referred to has found that the salaries of 45 of our 62 teachers average \$697 a year and out of this \$697 they have to clothe themselves, pay carfare, pay rent and board or if they live at home contribute toward the expenses of the household, buy books and educational periodicals, contribute to charity, in other words live like other people, and, I ask CAN IT BE DONE? The answer is NO. These teachers average a loss of \$32 a year, a fairly high price to pay for the privilege of teaching. At present several of our school janitors are getting larger salaries than teachers who have been in our employ over twenty years. "At

the present rate of teachers' salaries," to quote the Chicago Trade Survey "the average teacher will have to live to be 70 before her total earnings are as much as a laborer can make by the time he is 40." And I fear that a Vermont school teacher will become a centenarian before he or she arrives at this peak of worldly prosperity. And what will be the inevitable result if conditions are not improved? Over 145,000 teachers have abandoned this profession during the past year to seek more remunerative employment. Over 2787 teachers are employed in Vermont, and, today, only 210 are taking Normal School or Teacher Training Courses and our Normal Schools cease to exist in August 1920! The teachers of Rutland have not threatened any coercive measures, they have not thought of striking, they have been loyal, splendidly loyal,—I know of several teachers who have remained in Rutland in spite of more tempting offers to go elsewhere; but what will happen if any considerable number of our teachers decide that, after years of service, humiliating economies and starvation wages are all the recognition that their loyalty receives? Where will we look for others to fill their places?

I have taken some time to try and point out that the expense for education in Rutland is not high, that our educational offerings are on a par with those of other public school systems, that the loyalty of our teaching force is unquestioned and that, in spite of this fact, they are pitifully underpaid. If I have made out a case I believe that Rutland's taxpayers will at our March meeting register their appreciation in a form more substantial than mere verbal eulogies.

I may seem to be an optimist, I admit it. My faith in human nature and in our public school system is stronger than it was sixteen years ago. If I should serve for another sixteen years as School Commissioner, which heaven forbid, I expect that I shall be twice as optimistic as I am now.

Respectfully,
HARVEY R. KINGSLEY,
President of Board of School Commissioners.
Rutland, Vt., January 29, 1920.

Report of the Superintendent of Schools

To the Board of School Commissioners and City Council of
the City of Rutland:

In accordance with the regulations of your honorable board, and the requirements of the city charter, I herewith present my fourteenth annual report of the schools of this city.

The statistical tables and other data formerly published as a basis of comparison, also the reports of the Principal of the High School and of the heads of the special departments, have been prepared as usual but by special direction of the Board will not be published in the city reports. This plan, adopted some years since, seems to be satisfactory to the patrons of the schools and results in greatly reducing the expense of printing.

The school enrollment, membership and attendance for the natural school year ending June 30, 1918, were all smaller than for the several preceding years and these decreases continued during the Fall Term of 1918, due almost wholly to the prevalence of the epidemic of a year ago. Since January, 1919, the enrollment, membership and attendance in the schools as well as the school census show continued gains and are now greater than at any time during the past three years. The percent of attendance to membership, while not so large as in some years in the past, is now most satisfactory and considerably exceeds the general average in Vermont and in New England.

NEW SCHOOLS NEEDED.

The decrease in school attendance in 1918 and 1919 coupled with the necessity of conducting the schools with the strictest economy enabled the School Board to assign the pupils formerly attending the Gilrain Avenue and School Street

schools to other buildings and, by opening up two additional rooms, to close the two former buildings, thus saving rent, fuel, repairs and services of two janitors and three teachers.

If the present increase in school attendance continues it will become necessary to open one or two additional schools next Fall and the need of such schools will be the greatest in wards six and seven. To meet these demands the Board has one unoccupied room in the Lincoln Building, too remote to be of real service, an unfinished room on the third floor of the Kingsley Building and the old School Street Building, considerably out of repair.

I recommend that the Board give early consideration to this problem so that there may be ample time to secure proper accommodations for such additional school or schools prior to the opening of the Fall Term.

FINANCES FOR 1919.

The Financial Statement for the school year ending December 31st, 1919, made by the Finance Committee of the School Board and incorporated into the City Treasurer's report, shows that the gross receipts for the support of the public schools in this city were \$78,701.39. Of this amount \$66,466.69 was realized from city taxes, \$3,224.73 from the State, \$3,954.50 from tuition, \$1,055.25 from the sale of high school text books, \$189.38 from incidentals and ground rent, and \$3,810.84 unexpended balance of the previous year. The total expenditures were \$77,014.99. Of this amount \$57,790.85 was paid for salaries, \$3,593.50 for repairs on school buildings, \$8,446.75 for fuel, light and power, \$5,189.53 for text books and supplies, \$1,068.90 for insurance, rent, printing and advertising, \$925.46 for sundries, leaving an unexpended balance in the Treasury of \$1,686.40. An itemized statement of the assets and liabilities of the school department on December 31, 1919, filed with the City Treasurer, showed that the assets, which included cash balance in the Treasury, rebates from the state accrued but not due, fuel and supplies on hand, aggregated \$7,381.94, while

the indebtedness aggregated \$138.55, giving an excess in assets over liabilities of \$7,243.39. A similar statement of the assets and liabilities of December 31, 1918, placed the assets over the liabilities \$8,014.84. If this summary be compared with that given in my report of last year it will be seen that the gross receipts increased \$9,137.88 and the gross expenditures increased \$11,262.32, while the statement of estimated assets and liabilities of the school department filed with the City Treasurer remained nearly the same. The increased receipts were derived chiefly from city taxes, tuition, state rebates, the sale of High School text books and unexpended balance of the previous year, and the greater expenditures were caused by increases in salaries and in the cost of repairs, text books and supplies.

FINANCES FOR 1920.

The maintenance of the public schools is the greatest single expense that any municipality has to face and the one expense most willingly and generously met by its citizens. This problem of financing the schools, great under normal conditions, becomes more and more perplexing in times like the present. The higher salaries, higher cost of repairs and supplies of all kinds cannot be met by the low tax rate of former years. While the financial showing of the past year is good, due to the surplus of the previous year and to the fact that increases in salaries already granted have been met only for a part of the present year, it is very obvious that if the present rate of expenditures is continued, and the school tax remains as at present, the school expenditures for the present fiscal year will exceed the probable school receipts by more than \$5000, and I am unable to see how such a deficit at the close of the year can be avoided except by increasing the present tax rate for schools.

Again, the teachers and janitors are now asking the School Board for substantial increases in salaries and their request appears to me reasonable and just. These employees of the

city, more than seventy in number, are at present receiving salaries in no way commensurate with their worth and with the salaries paid in other lines of service. This condition is not peculiar to Rutland, but a nation-wide movement. The justness of the claim for higher salaries for teachers in Vermont was recognized and endorsed at a joint meeting recently held in Burlington of the State Board of Education and some two hundred and fifty school directors of the state when the following resolutions were unanimously adopted:

1. Whereas the salaries of teachers have been depreciated more than one-half by reason of the decline in the purchasing value of the dollar and
2. the larger wages and opportunities offered by industries have diverted many ambitious young persons from the teaching profession and have also attracted many who were employed in the schools so that there now exists a great scarcity of teachers and
3. the welfare of the State and the preservation of Americanization depends in a large measure upon the character of our schools and
4. as there is need that the teachers be assisted in their worthy efforts to reach a higher degree of efficiency,

BE IT RESOLVED:

1. That a real crisis exists in our public school system that threatens a breakdown of our schools.
2. That it is imperative that effective measures be promptly taken to prevent disaster.
3. That it is essential to provide salaries for our teachers which will decently support them, relieve their unrest and encourage their continuing in the profession of teaching and promote a respect for the calling that will assure a continued supply of capable teachers for the future.
4. That there should be a general increase in salaries of teachers throughout the State of at least 50% of salaries as they existed in 1916 before the United States entered the war.

In response to a request of the Rutland Teachers' Association the President of the Rutland School Board appointed a special committee, headed by the Mayor of the City, to investigate salaries, living and working conditions of teachers in this city. This special committee has made its report to the School Board, in which it is unanimously recommended that an increase of practically \$300 be made to the salary at present paid each teacher in this city.

In view of these demands for higher salaries and to provide funds to meet increases in the general expenses of the schools, including the opening of one or more additional rooms, the School Board has unanimously voted to ask the citizens of Rutland for a substantial increase in the school tax for the present year. While this new tax rate for schools may appear high, it should be borne in mind that the increases in salaries asked for are no greater than those now being granted elsewhere in the state and the tax rate for schools would still be low compared with that to be asked for in other important towns of Vermont.

The following table gives the tax rate for current school expenses for the years 1917, 1918 and 1919, and the percent to be asked for the present year, in the ten largest places in Vermont.

Town or City	School tax 1917 expended	School tax 1918 voted	School tax 1919 voted	School tax 1920 asked
Rutland	55c	55c	55c	75c
Barre City	82½c	85c	103c	153c

St. Johnsbury	62c	80c	90c	125c

TEACHING FORCE.

Since writing my last report two of our most respected teachers have passed away—one had taught in this city for thirty-four years, the other for twenty-three; both have been

for many years principals of grade buildings; both were women of high ideals and of sterling character; both were devoted to their work and were universally loved and honored by their pupils and by the entire community. Resolutions adopted by the Rutland Teachers' Association show the esteem in which they were held by their fellow teachers.

The "Silent Messenger" has entered the ranks of the Rutland Teachers' Association and taken our beloved co-worker, Rose C. Carrigan, one of the oldest in service, and most respected of our teachers.

She has lived her life of service faithfully and earnestly and her name will ever awaken a throb of remembrance and appreciation in the hearts of all who came under her sway.

She will be missed by many, and our Association has lost a loyal worker and a staunch member.

"We know not where His islands lift
Their fronded palms in air;
We only know we cannot drift
Beyond His love and care."

Once again the Angel of the Lord has entered our ranks and Bessie M. Otis, whom we knew so well and loved so tenderly, has been called to her Heavenly Home; but ever and forever will sweet memory of her live in our hearts. No words are needed to tell of her deeds of loyalty and the manner in which she endeared herself to the whole community. Her loving, unselfish life, the ability that she manifested and the kind sympathy which she extended to others will always be remembered and appreciated by those who knew her well. By her death, our Association has lost a strong worker and a noble member.

"The veil is thin, which intervenes,
Rent by a passing breath,
That gives to me my own once more,
Forever, on a fairer shore,
And yet—you call it Death."

Eleven changes have occurred in the teaching force during the past year. Three teachers resigned to be married, two substitute teachers were replaced by regular teachers and six teachers resigned because of low salaries.

In my last report reference was made to the subject of salaries paid in Rutland and, since conditions that then existed have not materially changed and what I then said is equally applicable now, I quote from that report as follows: "While the salaries of all teachers and janitors were increased at the beginning of the present school year they are still low in comparison with the wages paid in other lines of work and to the high cost of living and do not bear a just proportion to the aggregate expenditures of the school department."

"The demands upon teachers were never so great and exacting as at present and the purchasing value of the dollar has shrunk to that extent that the salaries to-day are relatively much lower than they were ten years ago. This matter should receive the thoughtful attention of the Board and if possible adjustments in salaries should be made so that the teachers may receive a fair and just return for their labors and at the same time be able to improve themselves professionally and make some provision for support during the years of retirement."

TEACHERS' RETIREMENT SYSTEM.

The Vermont State Teachers' Retirement System went into operation July 1st, 1919. This law was enacted to provide for the retirement of teachers on account of age or disability with an annual allowance. The teacher contributes not exceeding five per cent of her salary, which amount is doubled by the State and placed at interest to the teacher's credit. The income of this amount with other contributions from the state and from the retirement association will provide a life annuity when the teacher retires. The system is voluntary, but forty-two of the teachers of this city have come under its provisions.

The law in many respects is a distinct advance over similar laws enacted in other states and is likely to become the

model for future legislation on this subject. The question which should confront the teacher not already a member of the Retirement System is not whether she can afford to come, but rather whether she can afford not to come, under the provisions of this law.

At the last annual meeting of the city the citizens by a very large majority voted a pension of \$25 per month to Rose C. Carrigan, but her death occurred before she entered into the benefits of that pension. The citizens at the next annual meeting will again be asked to vote upon the question: "Shall the Board of School Commissioners be authorized to grant a pension of \$25 per month for one year beginning April 1st, 1920, to a teacher in this city in accordance with Section No. 1218 of the General Laws of the State which provides for the pensioning of a teacher who has taught in the public schools for over 30 years?" The teacher named in this article has taught in the public schools of Vermont in excess of 32 years and in this city for 27 years, and during the greater part of her service in this city she acted as one of our grade principals. For two years she has been disqualified on account of sickness, and at present she is an inmate of a Sanitorium in this state. She was one of our most worthy teachers and I believe it most fitting that the voters of the city should recognize her service and her worth by granting her this pension.

HIGH SCHOOL.

The High School has had a successful year. The number of students in attendance, as well as the number of non-resident pupils and the amount of tuition collected, exceed all previous records. The instruction in all departments shows efficiency; the scope of work and the influence of the school is continually being enlarged to more fully meet the demands of the community and to render the greatest possible benefits to all its students. The per capita cost along with general advances in conducting all similar institutions has increased to that extent that it would seem proper to re-adjust the tuition

rates so that non-resident pupils should bear a larger proportion of the expense of maintaining the school.

The Principal's report to me contains so many points of vital interest not only to the patrons but also to the management of the school that I quote from his report as follows:—

"The building is in better shape than at any previous time. Most of the problems of heating and ventilating have been solved. There is still a lack of air control in the rooms of the new part of the building.

EQUIPMENT.

Several items have been added to the equipment of the school the past year; a new balance for Chemistry, dishes and mirror for Domestic Science, and some reference books. A teachers' professional library has been started and should be increased as fast as circumstances permit. The equipment for Science is very small and should be enlarged somewhat. If work in Manual Training is resumed next year some additional equipment will be needed. If classes continue large, the purchase of an opaque projector for use in English should be considered in order that compositions may be thrown on the screen and corrected by the classes and teacher. Entire classes would then get the benefit of the correction of each written paper.

Many of the typewriters are getting old and will have to be replaced soon.

The piano placed in the Assembly Hall by the Parent Teachers' Association has been a source of stimulation to better efforts in music.

INDUSTRIAL COURSE.

The part time Industrial Course is now working well. In spite of Federal Aid the cost per student is excessive. I feel that the boys taking this course are getting much more benefit than they would get from other work, and several have been enabled to stay in school who otherwise could not.

COMMERCIAL WORK.

We believe we are now getting a better product from our Commercial Department than before because we are getting

a better selection of students, and giving practically all the commercial work in the last two years, where it will be fresh in practice when students leave school.

COLLEGE PREPARATORY WORK.

From the last three classes 57 students have entered regular college courses. All but four of these are still in college, and none of these four left because of failure. The majority of these are in Vermont colleges, but the list also includes Yale, Smith, Hamilton, Colgate, Holy Cross, Wellesley, Simmons, Columbia, Worcester Polytechnic Institute, Harvard Dental School, Cornell, Dartmouth and some others.

GENERAL COURSE.

After providing for College Preparatory, Commercial, Industrial, and Domestic Science students, we have left a considerable number who are taking work to get the best general education the school can give, and another group who are in school simply because it is the socially correct thing to go to school rather than to do something else. Most of this trouble is traceable directly to parents who seem to believe that if their children can spend a few years under a high school roof they can always thereafter wear a white collar, and depend upon society to support them in a position of dignity and ease. All parents should realize that a student gets out of an education what he puts into it. The school can direct and encourage his work, but it is *his* work and not that of the school that gives him such an education as will fit him for a serviceable and remunerative place in society. It is the work done outside of school hours at home that makes the difference between success and failure.

TEACHER TRAINING COURSE.

The Teacher Training Course offers a systematic and thorough review of the common school subjects and gives training in the care and instruction of children. There is no

better preparation for later home life than two or three years of teaching in a country school.

GENERAL CONDITIONS.

This has been the hardest year in school in my experience as either student or teacher. The general unrest in industrial conditions has had a strong reflection in school work. Many students who were excused from school work for emergency war work have come to feel that if they could be excused for war work perhaps school work is not so important after all. Constant pressure has been needed to secure full attendance, and, moreover, when students see the fabulous prices paid for unskilled labor in comparison with those paid for skilled and educated labor, they question the need of further preparation for work. The teacher with a college training who is receiving considerably less pay than an alien enemy unskilled day laborer who cannot read or write is not in the most advantageous position to impress a boy with the necessity of faithful application to study.

The State Department of Education recommends that the average size of classes should not be over 25 and that in no case should the class exceed 30 in number. Based on the average membership for the first half year, 27 of our 50 classes in English, Latin, Mathematics, Science, French and History have exceeded 30 in number and five of them have exceeded 40.

The addition of another teacher in English for the second half of the year will relieve this strain somewhat. But if students are to get what they are entitled to, the size of the classes should be materially reduced.

The building is now taxed to its capacity. We have no room for further material increases in numbers, and if the School continues to grow, some provision will have to be made very soon to take care of the increases. The city must soon face squarely the necessity of additional high school facilities.

In spite of all these handicaps, I feel the general tone and spirit of the school are good. The percentage of failures at mid-years has been reduced from 19.8% for the school year of

1916-17 to 11.1% for the present half year. Serious failures and troubles in discipline are limited to some 25 students or 6% of the whole school. The social, athletic, musical and dramatic phases of school life are wholesome and well sustained. The introduction of compulsory physical training in the school has proved highly beneficial. The cooperation with the homes has been materially improved."

IMPROVEMENTS SUGGESTED

With the disturbed social and economic conditions and the ever growing demands upon the treasury during the last three years I have hesitated to recommend enlarging the scope of our public schools, in fact in many cases I have counseled retrenchments. With the return of normal conditions I would suggest improvements along these lines.

1. The surplus of text books and supplies has been exhausted, and from time to time this surplus should again be built up. It is impossible to conduct the schools economically and efficiently without a considerable surplus. The number of pupils per grade room, which now averages 40, should be reduced if possible to 35 per room to enable the teacher to give more individual attention to the pupil and to secure better results.

2. Last April the Board opened up part-time Kindergarten schools for all pupils of the city who would become eligible to attend school in the fall. While Kindergarten in name, these schools did much first grade work and aided greatly in enabling those pupils to make the first grade, where the number of failures is greatest in any school system. Some 80 pupils entered these classes which shows the favor in which these schools were held by the parents. I recommend that this policy be continued during the present year. The Medical Inspector has strongly recommended one ungraded school for sub-normal pupils and those greatly below grade and I heartily endorse this recommendation.

3. In our country there are more than thirty million people of foreign parentage. In the last selected draft more

than 700,000 drafted men were unable to read or write. More than a dozen nationalities reside in our city and I ask you frankly what is the city doing to educate these illiterate foreigners above compulsory school age. School funds are denied them and until very recently the school houses have been closed against them. Education is the greatest safeguard to Republican institutions. Within twenty years after the close of the Franco-Prussian War France built 100,000 school houses and a distinguished French writer has said that these schools saved the life of the new Republic and made France the France of today. I recommend without reservation the establishment next year of public evening schools even tho it is necessary to maintain them out of the school funds.

4. During the present year Manual Training has been allowed to lapse largely for financial reasons. This course should at once be reestablished. For a number of years Sewing has been taught in the grades as well as in the High School but Cooking has been confined to the High School. In as much as more than one-half of our children never enter High School and less than one-half of those entering graduate, I believe that instruction in this important subject should be brought into the grades as early as possible.

5. In my former reports I have tried to show the advisability of establishing a Junior High School and eliminating from our system our ninth grade. More than 30 such schools are now in successful operation in this State. The greatest obstacle in accomplishing this result is the lack of school funds and a suitable building and it is probable that some time may elapse before these hindrances can be overcome. Until this desirable object can be attained I advise the consolidation in one building of our present ninth grades which would facilitate departmental instruction and better prepare those students to enter our High School.

6. The High School Building is now taxed to its capacity, and with further growth of the school the problem of accommodation will become serious. It is, therefore, probable that

in the near future it will be necessary for the citizens to take some action in this matter. While we do not anticipate immediate action it would seem to me that the best solution of the problem would be to erect a new modern high school building and use the present structure for a Junior High School.

CONCLUSION.

In closing this report I wish again to make hearty acknowledgement of the unfailing courtesy, good will and assistance so generously extended to me during the past year by all with whom I have been associated.

Respectfully submitted,

DAVID B. LOCKE,
Superintendent of Schools.

Rutland, Vermont, February 14, 1920.

APPENDIX

LIST OF TEACHERS IN THE EMPLOY OF THE CITY OF RUTLAND DURING THE FINANCIAL YEAR ENDING
DECEMBER 31st, 1919.

Name of School and Teacher	Grade	Where Educated	Salary	Service Began
David B. Locke.....	Superintendent.....	Dartmouth College.....	\$2,500 00	1906

Auditors' Report

To the Honorable City Council:—

We have verified the notes, bonds, deposit books and other securities belonging to the City in the hands of the City Treasurer, and Sinking Fund Commissioners, and find the same correct. We have also examined the accounts of the City Treasurer, City Clerk, Overseer of the Poor, Superintendent of Schools, and Sinking Fund Commissioners, and find that all moneys received by them have been duly accounted for, and they have proper vouchers for all moneys expended.

We also find that the records of disbursements as shown by the City Clerk and Superintendent of Schools agree with the entries shown on the Treasurer's book.

We would mention that we found the various books and records in all departments in good order, and vouchers for all disbursements were produced.

There are balances on the Treasurer's books showing uncollected taxes as far back as 1910, and while the earlier balances are small they should either be collected or charged off the books if they are not collectible.

JAKE HEYMAN,
ROBERT D. SMITH,
W. T. SIMONDS,
Auditors of the City of Rutland.

Rutland, Vermont, January 23, 1920.
